INTRODUCTION

This is a DisplayPort to VGA signal format converter for interfacing next generation DisplayPort
based PC and notebook computers with conventional VGA displays, such as CRT, LCD monitors,
and projectors. DisplayPort offers a unified, scalable, and cost effective interface for embedded
and external display applications. As desktop and notebook PCs are increasingly transitioning
from conventional analog type interfaces to DisplayPort, the converter facilitates the transition by
offering seamless connectivity between new DisplayPort PC and notebooks and the installed base
VGA monitors and projectors.
